

Looking for an easy, quick online calendar that will communicate your church events to your congregation while helping you assign and track your resources?

Worship Services, Ministry events, Meetings, Weddings, Community Events, Classes, staff retreats, staff vacations, hospital visitations ... the list can seem endless.

Organizing a full schedule of church events while making sure rooms, equipment and vehicles are utilized, available and managed can be a daunting task

- Available as a hosted service or software you install on your server
- Event scheduling and resource management in one powerful solution
- Day, Week, Month and List Views
- Scales to accommodate from one to unlimited public and private event calendars with unlimited users
- Choose to allow or not allow overlapping events
- Email notifications and reminders lets your people know about upcoming events and event changes, to help keep everyone on time
- Attach files (photos, documents, etc.) and URLs to your events and activities
- Multi-level security controls calendar access to the level you need
- Get events from your calendar and display them elsewhere on your web site. (i.e. Automatic home page announcements)
- Download calendar events and activities into your PDA for 24/7 viewing access
- Integrates easily into any web site, intranet or gateway
- Customizable appearance provides flawless incorporation into your existing web site

The solution: Connect Daily Web Calendar Software

Schedule your events while assigning and tracking your resources quickly & easily with Connect Daily. Instantly edit and view your calendar from anywhere using just your web browser.

No Long Learning Curves with Time Saving Features

Connect Daily web calendar software allows you to enter calendar events intuitively. Repeating events are simple and entered only once saving you valuable time.

Simple Resource Handling / See Any Conflicts At-a-Glance

When you add a resource to your event Connect Daily alerts you of any conflict and helps you prevent double bookings. A glance at the bar chart view lets you see potential conflicts immediately, bringing about a faster resolution.

Set-Up and Tear-Down Times Made Easy

Often, an event requires setup time prior to the actual event and afterwards, teardown time. Resources are not available for use by others during these periods. Connect Daily reserves your set-up & teardown time and resources while showing only your scheduled calendar event.

Calendars for Your Congregation / Calendars for Your Staff

Show calendar events specific to the interest of your parish or congregation families. Be able to provide individual calendars for children's or youth events, music, men's & women's ministries, and your worship schedule. Have Connect Daily combine 2 or more calendars in any combination you need for consolidated event viewing.

Login to a secure area to access pastoral and administrative calendars where staff retreats and vacations can be remembered.

Purchased or Hosted

You have a choice with Connect Daily. You can install your calendar directly onto your own web server or you can have the same great web calendar software, hosted and maintained for you by MH Software Inc.

Affordable Without Compromising on Ability

Get the most calendaring capability while maintaining your budget. Non-Profit pricing available.

"From an administrative standpoint, both the initial set up and ongoing maintenance of the system are very intuitive and uncomplicated. While it is important to thoughtfully consider and organize a calendar structure from the beginning, I have found that anything I've done can be undone with minimum effort and stress. In addition, training users has been simple because the system is so straightforward."

Sharleen Walkoviak, Covenant Technology Services
