

Looking for an online calendar to use to communicate information about school activities, meetings, field trips, homework assignments and upcoming projects to your school community?

Want to track your school's resources while scheduling your events?

Connect Daily Web Calendar Software is the answer.

Schedule your events while assigning and tracking your resources quickly & easily. You can instantly edit and view your calendar from anywhere using your web browser.

No Long Learning Curves with Time Saving Features

Connect Daily web calendar software allows you to enter calendar events intuitively. Repeating events are simple and entered only once saving you valuable time.

Reduce Costly Copying and Lost Documentation

Connect Daily allows calendar attachments, letting you put permission forms and medical releases with your field trips; homework and project notes with your assignments; agendas with your meetings; and more.

Size is not a problem

Whether you are at the District level and need calendars for every school or are an individual school, whether you have one user or thousands, Connect Daily web calendar software makes staying informed faster and easier.

Purchased or Hosted

You have a choice with Connect Daily. You can install your calendar directly onto your own web server or you can have the same great web calendar software, hosted and maintained for you by MH Software Inc.

Affordable Without Compromising on Ability

Get the most calendaring capability while maintaining your budget. Educational pricing is available.

- Available as a hosted service or software you install on your server
- Supports Mac or Windows clients
- Event scheduling and resource management in one powerful solution
- Scales to accommodate from one to unlimited public and private event calendars with unlimited users
- Download calendar events and activities into your PDA for 24/7 viewing access
- Email notifications and reminders let parents know about upcoming events and event changes, to help keep everyone on time.
- Recognize and resolve resource and event conflicts quickly
- Multi-level security controls calendar access to the level you need
- Integrates easily into any web site, intranet or gateway
- Customizable appearance provides flawless incorporation into your existing web site

"I appreciate the Connect Daily software for the service it offers in integrating calendars from different sources to provide much needed information in a very user-friendly mode. The features offered by the Connect Daily software are versatile and easy to learn and use and appear to cover all our needs for disseminating calendar information to a wide audience."

Andrea Lawless, Director of Communications at Presbyterian School – Houston
